...are you ready?

InfiNet's Outsourced Technology Center

In today's volatile world, business systems are more vulnerable than ever. Virus attacks, building evacuation, critical data loss and other risks are more certain than ever.

Is your network ready?

InfiNet's Outsourced Technology Center™ (OTC) provides a new level of risk avoidance to small and medium size businesses. It offers significant cost advantages, while addressing the need for security, availability, access and support.

support

VIRTUAL SYSTEM ACCESS

Today's world is unpredictable. Access to your information system should not be. Office and system access are most vulnerable to indirect threats focused on neighboring tenants within or near your facility.

Our services include:

- Office, home and traveling user access
- Secured Internet access and hosting with firewall protection
- Categorical content blocking and full virus protection
- Fully managed e-mail and complete applications support

InfiNet's OTC gives you peace of mind by removing the requirement of office access in order to perform business.

FULLY INTEGRATED SECURITY

Data integrity risks include virus attacks, unsecured server penetration, disgruntled associates removing data and hackers scanning for their next prey. How will your firm meet these challenges?

Our solutions provide:

- Redundant server and application platforms
- Drive arrays for all critical data and applications
- Encrypted Virtual Private Network connections
- Daily off-site data vaulting for all managed data

By locating the platforms in a hardened data center, you can be assured your data is available when you need it, where you need it.

EASILY SCALED PLATFORMS

The OTC model allows small- and medium-size organizations to rapidly “right size” the system as needed. You no longer need to plan for expansion months ahead.

Our options include:

- Dedicated data circuits to your office
- Full desktop security administration
- Packet shaping for guaranteed performance
- OneCall™ provisioning for new users in 24 hours

No matter what your needs, the InfiNet OTC has the ability to address them, removing the pain and cost typically involved with self-operation.

PROFESSIONAL, COURTEOUS SUPPORT

InfiNet is highly sensitive to the need for quality user support. Our specialists have been perfecting our process for two decades. The InfiNet help desk engineers are some of the finest professionals in the industry.

Our support includes:

- 24x7x365 active monitoring for all platforms
- Help desk operations customized to your business
- 24x7 dispatch options for mission critical issues
- Fully staffed data center for problem resolution

InfiNet’s ability to keep your associates operating is a key element of sustained productivity, and we are proud of our track record for customer satisfaction.

SIGNIFICANT CAPITAL SAVINGS

The best system in the world is useless if it does not fit your capital limitations. The InfiNet OTC has repeatedly demonstrated a far greater return on investment than self-operations.

Our OTC offering provides:

- Class A data center amenities and support
- Elimination of costly technology refresh cycles
- Staff focus on your core business, not IT needs
- Typical savings of 20% or more over self operation

Predictable results, professional service, peace of mind, ease of planning and reduction of capital costs are now a reality for the small to medium size business owner.

EXECUTIVE BRIEFINGS

For a limited time, InfiNet will extend a free executive briefing to outline our offering and review how our services will benefit your company.

Dependent upon your specific needs, the appropriate solution may range from a complete OTC relationship to a subset of our specialized services. Our specialists will meet with your executive management staff to plan the most cost-effective way to address these mission-critical issues. And be sure to ask about our “guaranteed savings” promotion!

For more information on the InfiNet OTC, please feel free to call for a personal consultation, or visit our Web site at www.infinet1.com.

At InfiNet, we have one goal; to be the premier provider of virtual networking services, assisting the growth of small and medium size enterprises through the use of best-practice outsourcing techniques.
